**Work Group discussion on SRM Availability**

Robert began with a brief summary of the work group efforts to date. Development of an Implementation Guidance document by the recently established work group has begun but not progressed significantly due to other commitments. Robert has reviewed a chemistry guidance document as a formatting guide and has collected previously prepared materials to prepare a preliminary draft for work group review. Robert anticipates distribution of this latter document prior to the next ATEC meeting.

From the August meeting an issue regarding use/applicability and availability of 2063 was presented. Upon Bob's inquiry as to "if an action item was established regarding this question", the consensus of the committee was that this requires no further efforts or actions from the ATEC.

### **Old/New Business**

No new or old business was presented.

The meeting adjourned at 1:25 PM ET. The next meeting of the Asbestos Expert Committee will be Wednesday, November 19, 2025, at 1:00 PM ET.
