

# SIX ELEMENTS OF A SUCCESSFUL LIMS IMPLEMENTATION

NEMC 2020

Presenter: David Riese, Regional Account Manager

PRŌMIUM

# WHAT IS A SUCCESSFUL LIMS IMPLEMENTATION?

## Basic measurements:

Is project on time? on budget?

## Other important measures:

Did you improve operations?

Are you more productive?

Provide greater access to  
information? Improve quality?

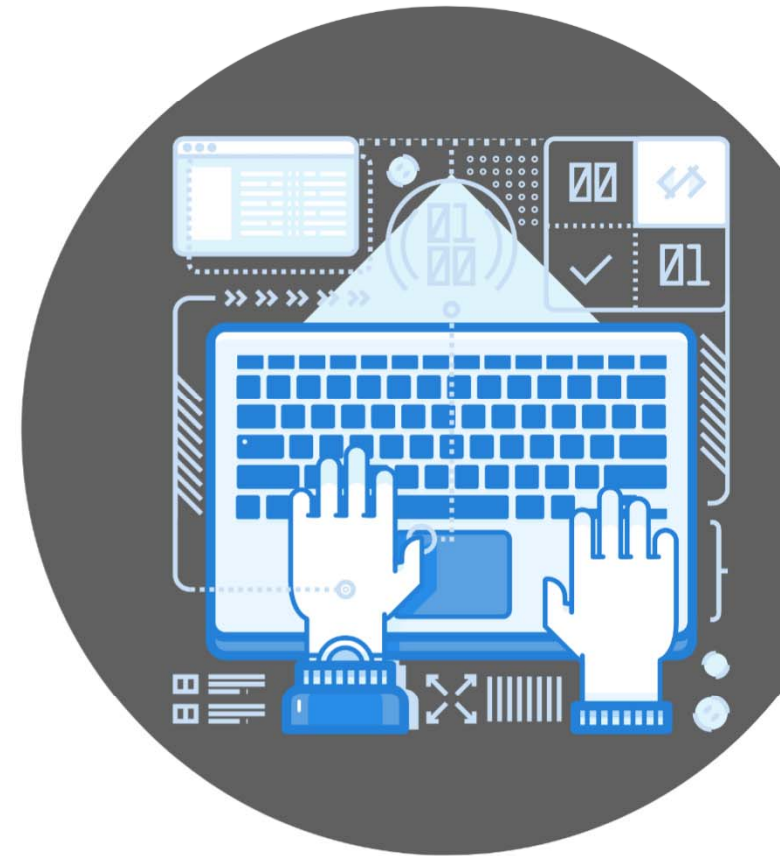

### **ELEMENT #1: LEVERAGE EXPERIENCE**

Leveraging the experience and knowledge of the LIMS provider will save time and eliminate implementation headaches. You already have a day job.

## ELEMENT #2: PRIORITIZE TRAINING

Formal training exposes people to the overall flow of the product. Spend your time working not guessing.

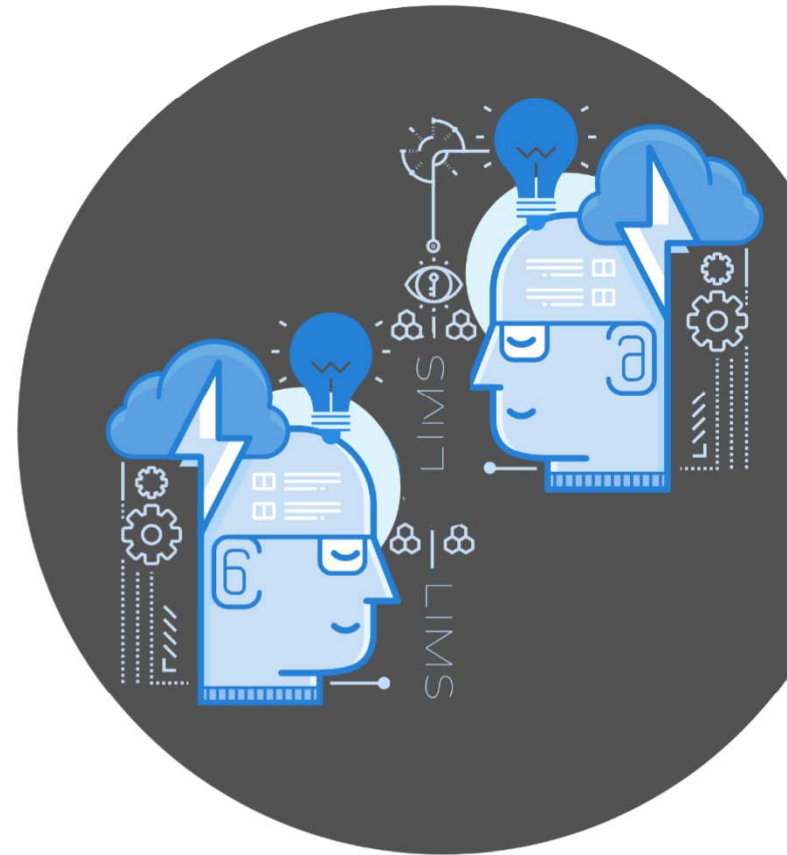

### **ELEMENT #3:** **CONFIGURE** (DON'T CUSTOMIZE)

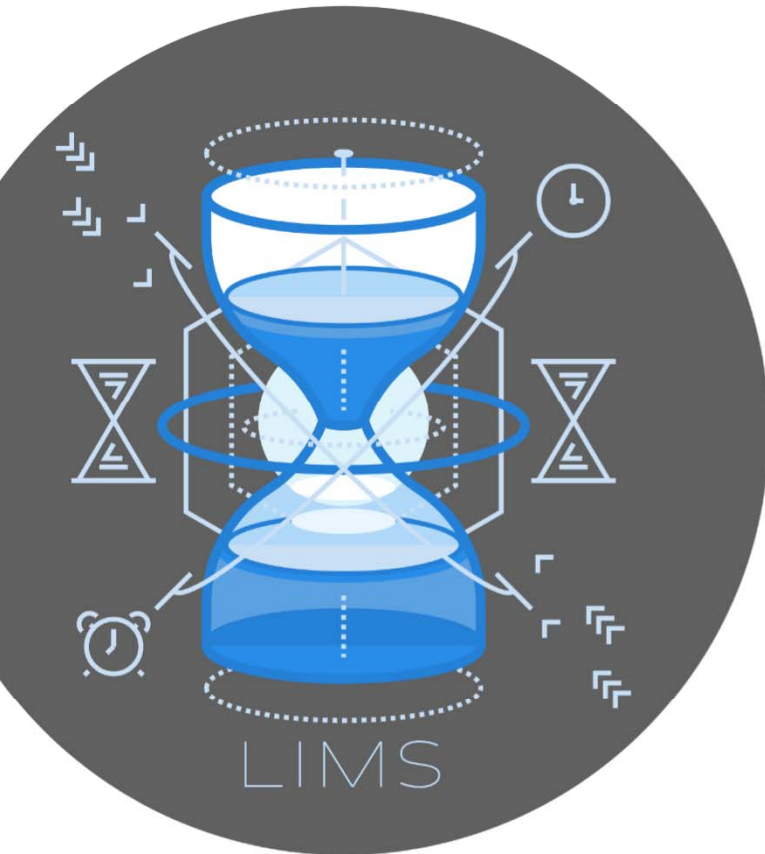

A highly configurable system is cost effective because changes don't require coding, and functionality is based on best practices from a large population of users.

## ELEMENT #4: ENGAGE YOUR TEAM

Inform and involve! Keep everyone informed, discuss what's in it for them, ask for feedback, thereby resolving potential issues early in the process.

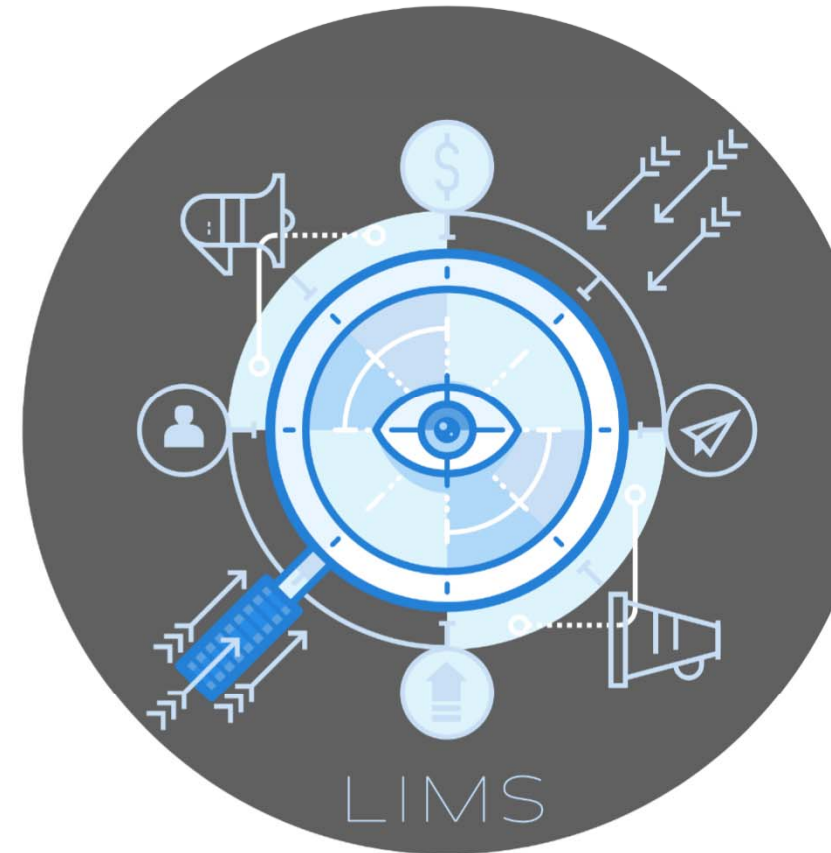

### **ELEMENT #5: DEDICATE TIME**

Make the implementation a visible company priority and allocate adequate time, staffing, and resources.

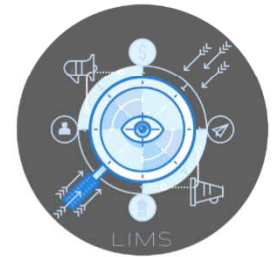

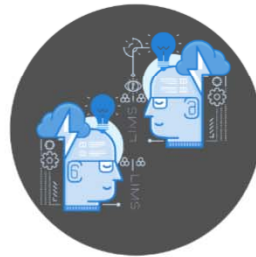

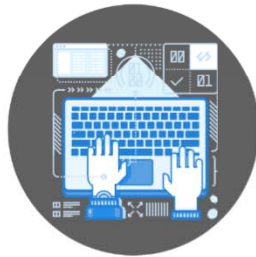

## ELEMENT #6: STAY FOCUSED

Pick your battles. Keep perspective  
and don't lose momentum over the  
inevitable small bumps in the road.
