## Recovery Checks for Inline Digestion

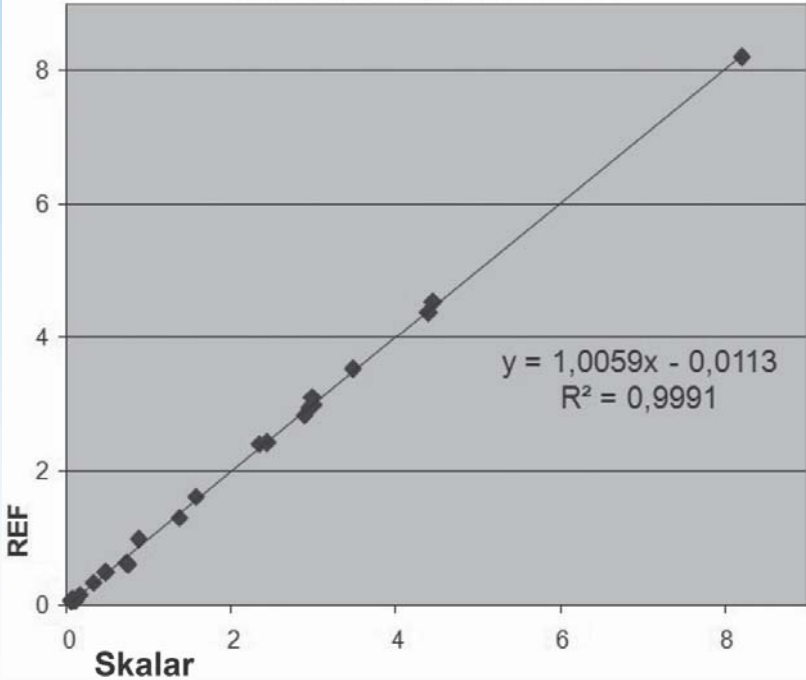

The efficiency of the automatic in-line digestion for TN and TP is well within the pre-defined acceptance criteria of the ISO standard regulation. QC standards were used in accordance with the ISO standard regulations and some other recovery standards used by different laboratories. The compounds mentioned are analyzed at 50% and 100% of the total range and the recovery criteria are +/- 5%.

Maximum range of 5 ppm N		
Glycine 5 ppm	5.10	102.00%
Urea 5 ppm	5.10	102.00%
NH <sub>4</sub> Cl 5 ppm	5.01	100.20%
Glycine 2.5 ppm	2.55	101.80%
Urea 2.5 ppm	2.54	101.60%
NH <sub>4</sub> Cl 2.5 ppm	2.52	100.60%
Maximum rang of 50 ppm N		
EDTA 25 ppm	24.73	98.92%
EDTA 50 ppm	49.41	98.82%

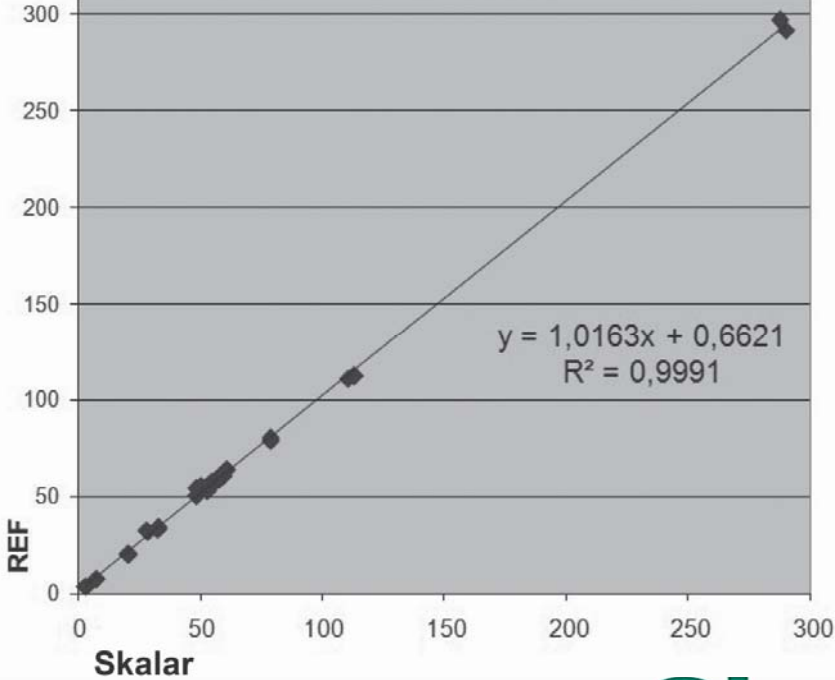

Maximum range of 10 ppm P		
Tripolyphosphate 10 ppm	10.44	102.00%
Pryrophosphate 10 ppm	10.45	102.00%
Pyridoxalphosphate 10 ppm	5.01	100.20%
Coccarboxylase 10 ppm	2.55	101.80%
Maximum rang of 1.0 ppm P		
Sodium hexametaphosphate 0.5 ppm	491.16	98.92%
Sodium hexametaphosphate 1.0 ppm	975.02	97.50%
Beta glycerophosphate 0.5 ppm	504.62	100.92%
Beta glycerophosphate 1.0 ppm	999.17	99.92%

# Comparison on real-world samples with the manual methods

### Skalar Total Phosphate method vs Manual reference method (REF)

### Skalar Total Nitrogen method vs Manual reference method (REF)

# Benefits of Inline automation on flow analysis

1. Safety
2. Reduction of chemical use and hazardous waste
3. Money, cost of distillation tubes
4. Consistent data
5. Time savings
6. Not limited to numbers in batch
7. Lower detection limits

# Automated methods using Robotics Platforms

1. BOD Automation
2. COD and test kit Automation
3. Sample prep stations
4. pH/Alkalinity applications

# Test Kit Automation

# Sample prep and processing

**Skalar** 

# Benefits of automation on robotics

1. Safety
2. Workplace injuries
3. Money
4. Consistent data
5. Time savings
6. Data integrity
7. System work unattended overnight

A graphic of a blue water splash with bubbles, positioned at the top of the slide.

Questions ??

A dynamic splash of clear blue water with bubbles, set against a light blue gradient background.

Thank you !!
