

Simple, Smart and Sustainable

The Environmental Lab of the Future

Suneet Chadha, VP/GM Applied & Food Segments

Agenda

- About Us - PerkinElmer Overview
- Megatrends Shaping Labs
- Laboratory Transformation
- Benefits of the Lab of the Future
- How to Begin Your Transformation
- Checklist / Roadmap
- Conclusions

Our mission of innovating for a healthier world is at the core of everything we do as a company...

...to create sustainable value for our planet, our stakeholders, and the communities where we live and work.

Helping tackle tomorrow's challenges, and making an impact for people and our planet, for generations to come

What We Do - Focused End Markets

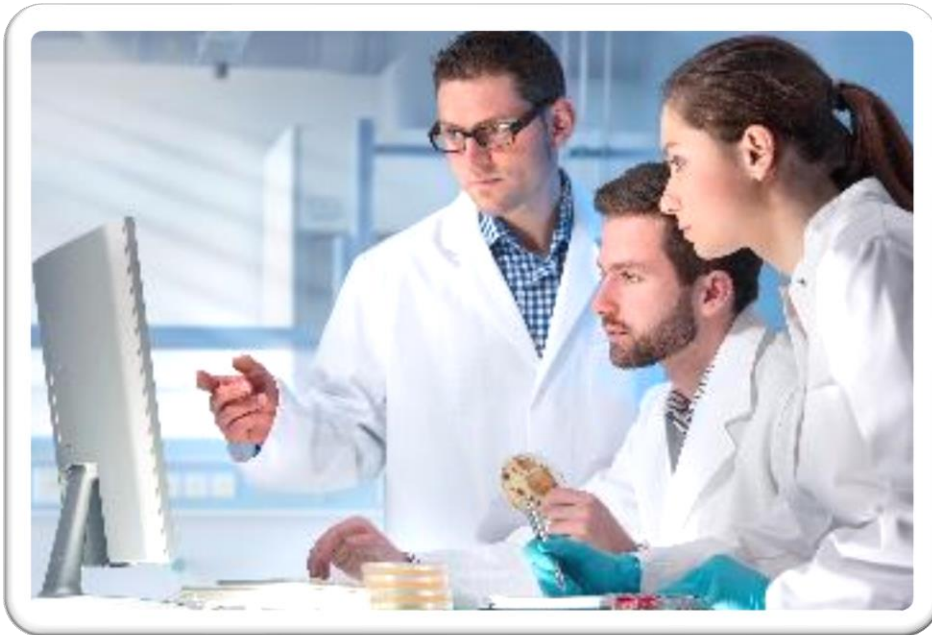

Instruments

Consumables & Reagents

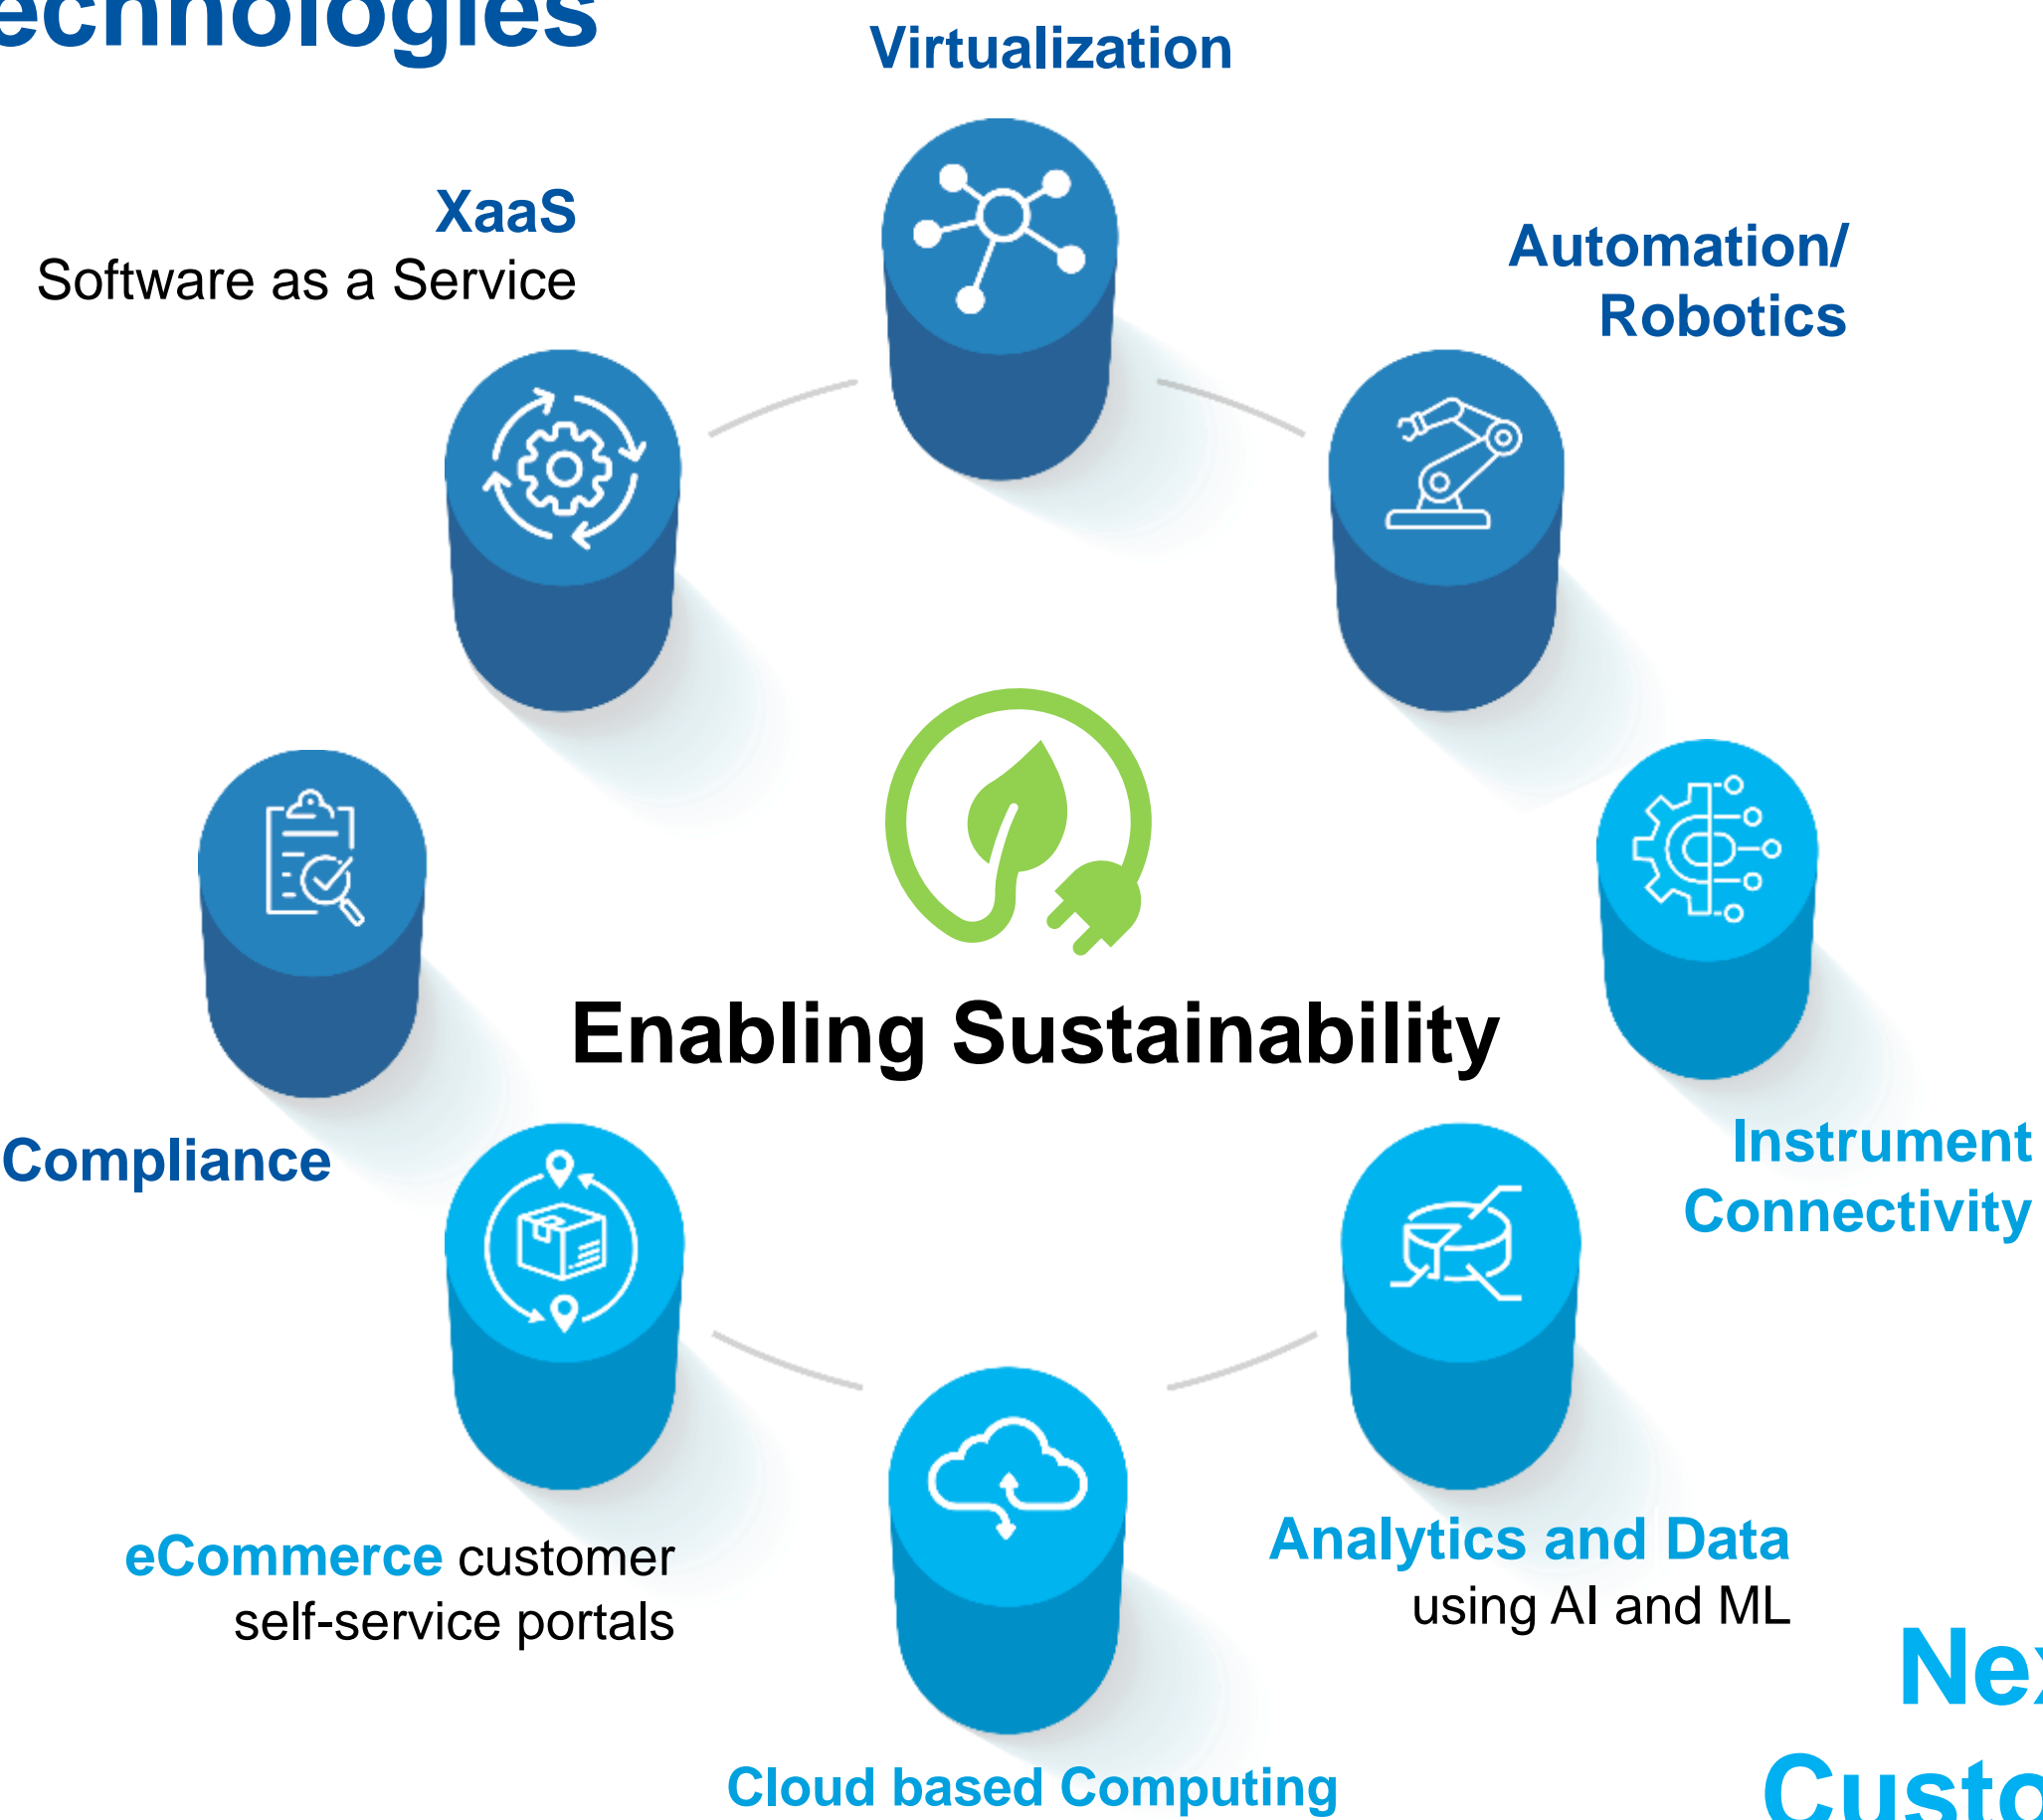

Software & Service

What We See – Megatrends Shaping Labs

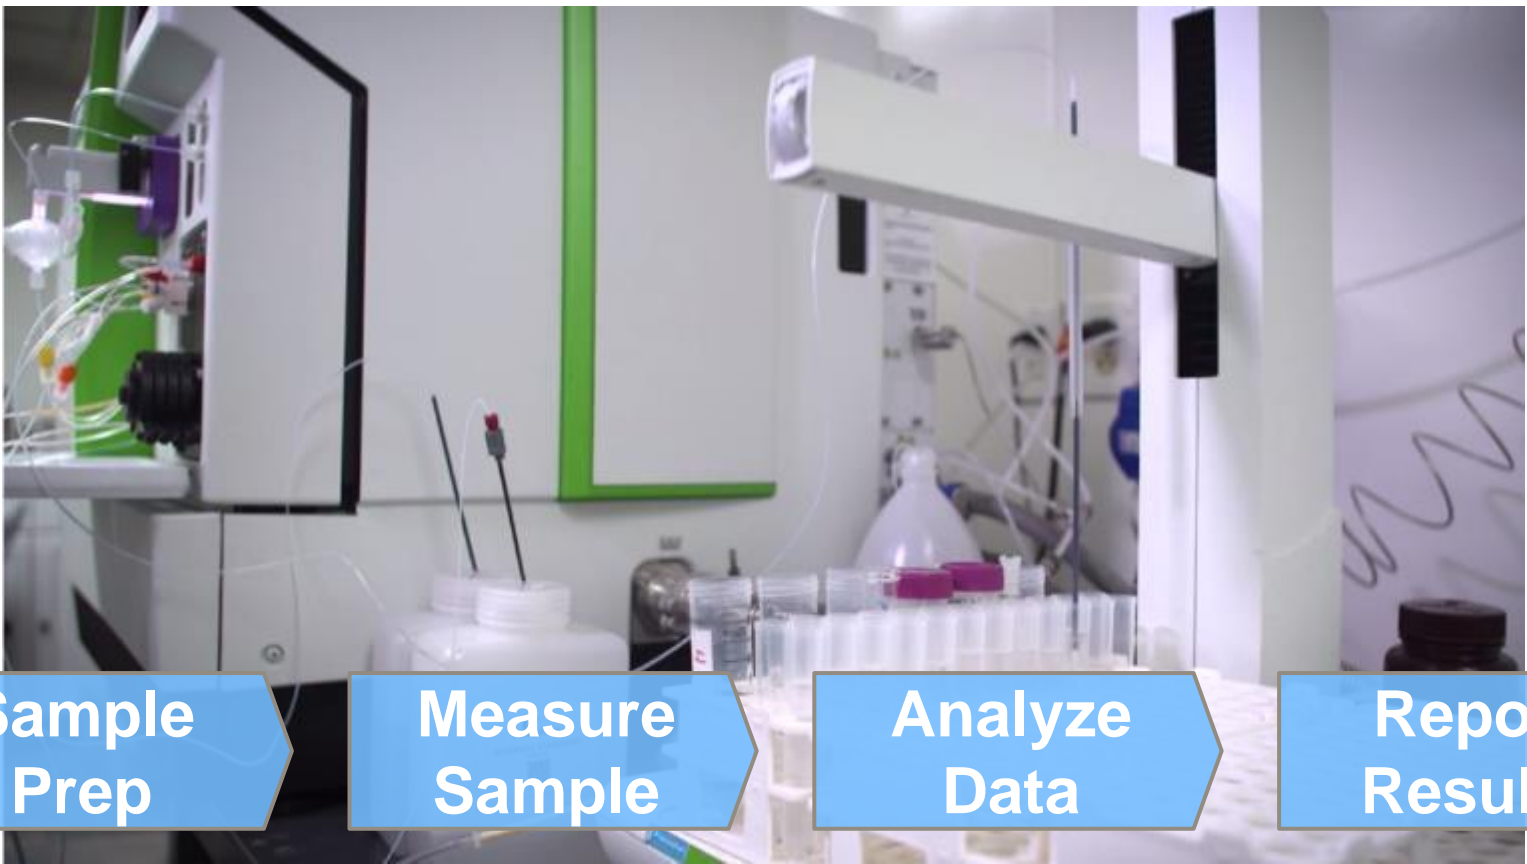

Next Generation Technologies

Next Generation Customer Experience

Lab of the Future

Intelligent robotics-aided workflows

The Environmental Lab of the Future

**Are there differences between an
Environmental Lab and other labs?**

Engaging with Environmental Leaders and Institutions

www.perkinelmer.com/library/envirochat-interviews.html

Key Take-Aways

**Environmentally
friendly
methods**

**Remote, Online
Monitoring**

**Easy to Use
Instrumentation**

**Future-Proof
Instruments**

**Simple,
Harmonized
Methodologies**

**Automation,
Increased
Throughput**

Engaging with Environmental Leaders and Institutions

“Automated systems are incredibly useful to us...time is money...”

*“We need to be more **efficient** without compromising **reliability** or **accuracy**.”*

*“We are interested in **simplifying analytical workflows** while **minimizing the use of organic solvents**.”*

What are Customers looking for

Productivity

Accelerating Science
Efficiency tools for scientists
Improving reproducibility
End to End Workflows

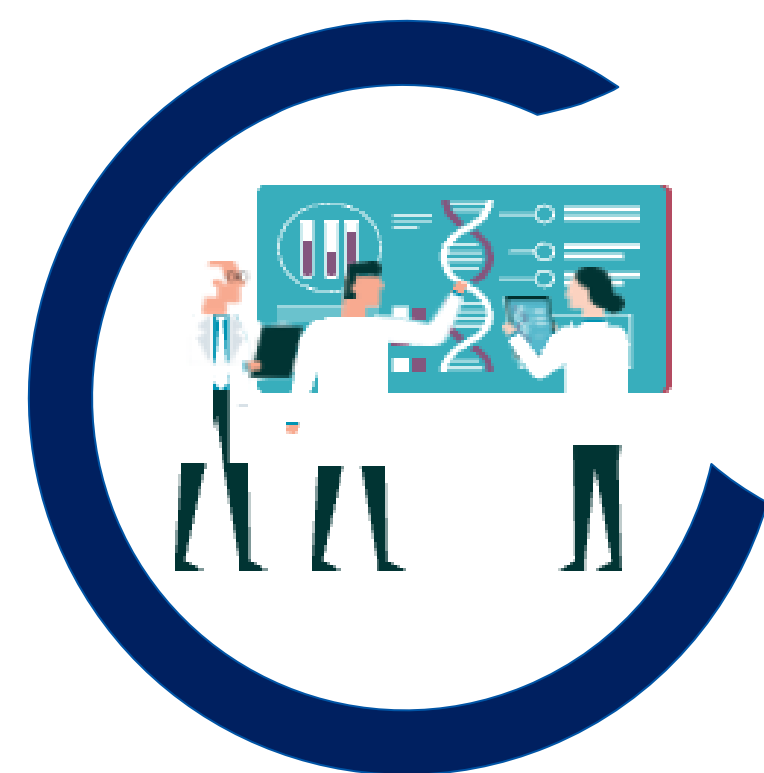

Sustainability

Energy Utilisation
Carbon Metrics
Waste

Insights

Actionable data
Standardising data sources
Customized reports

Innovation

UX
Utilisation Metrics
The digital Thread

Common challenges

Technology

- Legacy systems
- Existing data solutions
- Sunk costs
- Disparate Expertise

Security & Compliance

- Security / Internal IT requirements
- Regulatory requirements, controlled systems

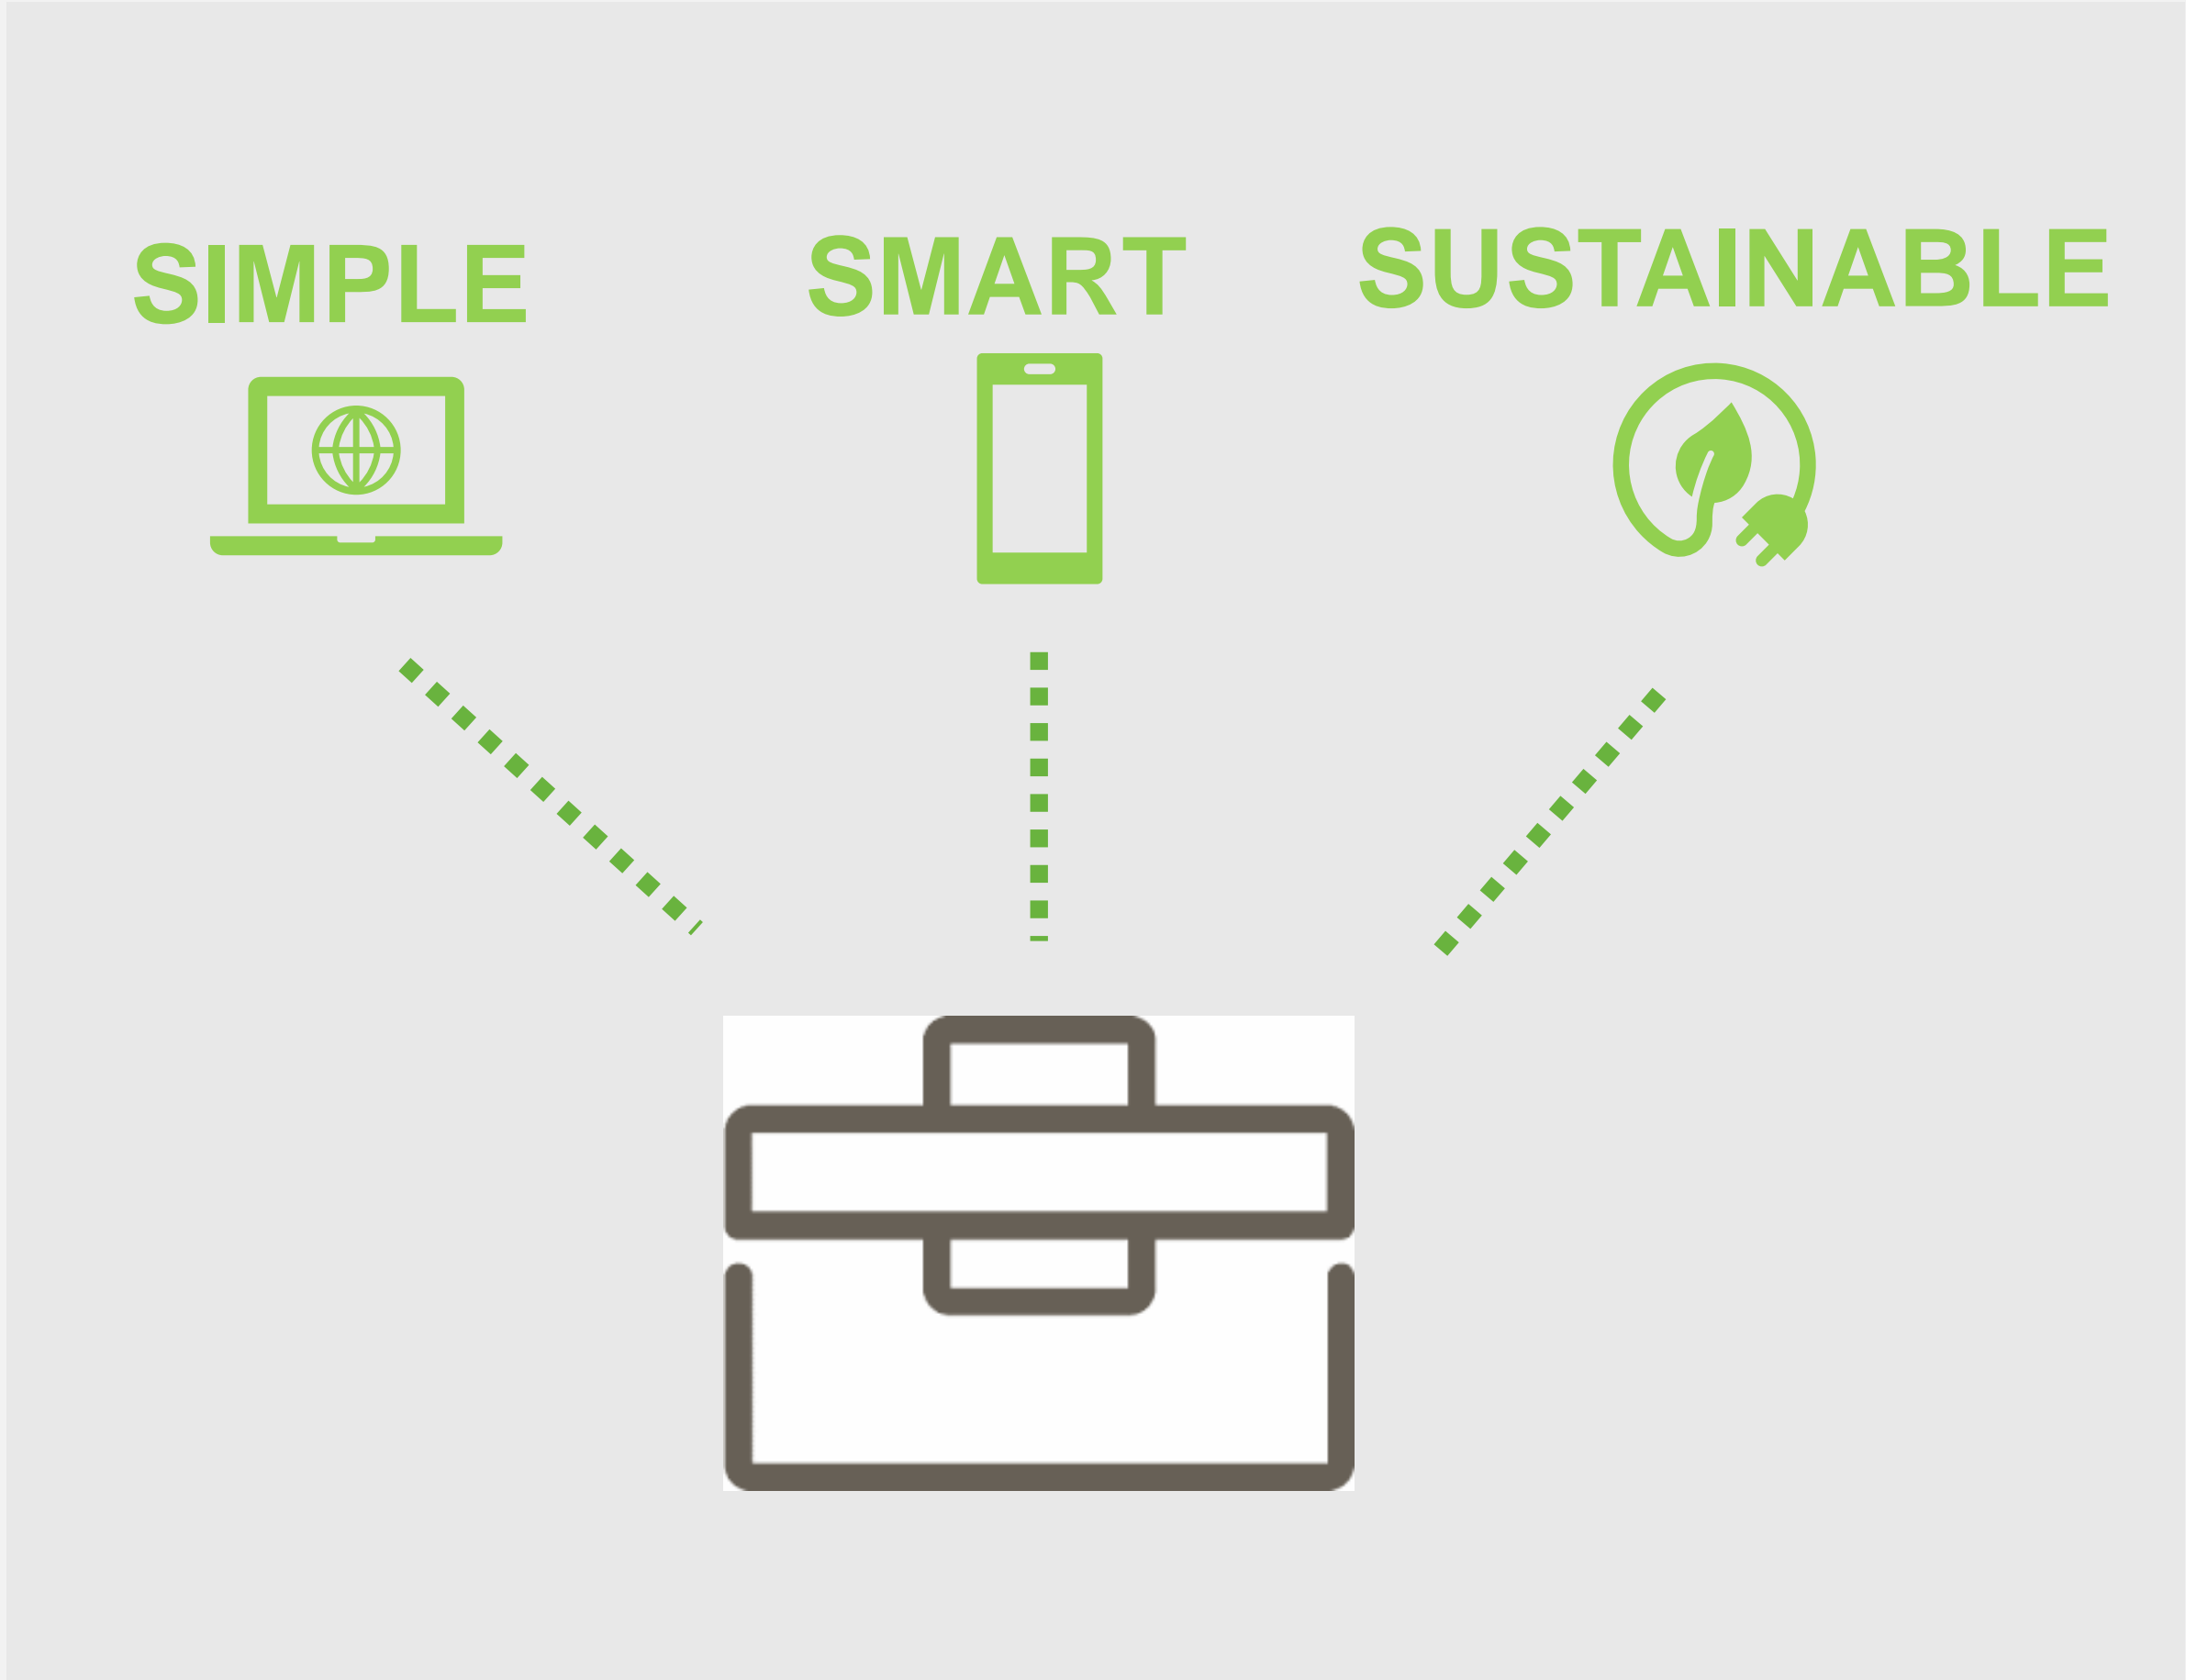

Data

- Silos: Data held within multiple departments and / or systems
- Accessibility to data
- Harmonization of data
- Software / Hardware
- Compatibility
- Data variability & complexity

Workload

- Ownership
- Volume
- Bandwidth
- Complexity

Lab of the Future

Laboratory Transformation

Understanding people & business needs

Samantha,
Senior Analyst

Kendra,
Lab Manager

Zhang,
Novice Analyst

1) Analyst Lab Experience

- Hardware introduction
- Software Training
- Coachmarks
- Simplified IA & Taxonomy

2) Complex Analyst Workflows

- Simplified IA & Taxonomy
- Persona-based Workflows
- Feature regrouping

3) Challenges Managing Labs

- Audit trails
- Sample tracking (Lab Management UI)

4) Customer Training Challenges

- Support & Training UI
- Micro-Interactions and user feedback
- Simplified IA & Taxonomy

5) Troubleshooting

- Real-time analysis feedback
- Micro-Interactions and user feedback
- Error Notifications

6) Unique User Preferences

- Flexible components and layouts
- Keyboard shortcuts
- Optimized settings

7) Difficulty Managing Data

- Indexible data sets
- Sort and Feature capabilities
- Optimized data graphing
- Real-time analysis

8) Lab Communication Issues

- Sample tracking (Lab Management UI)
- Alerts & Notifications

Laboratory Transformation

SIMPLE

- ✓ Modern, intuitive interface for ease of use, training
- ✓ Unified and workflow driven
- ✓ Cross portfolio, cross platform software
- ✓ Efficient laboratory operations

Laboratory Transformation

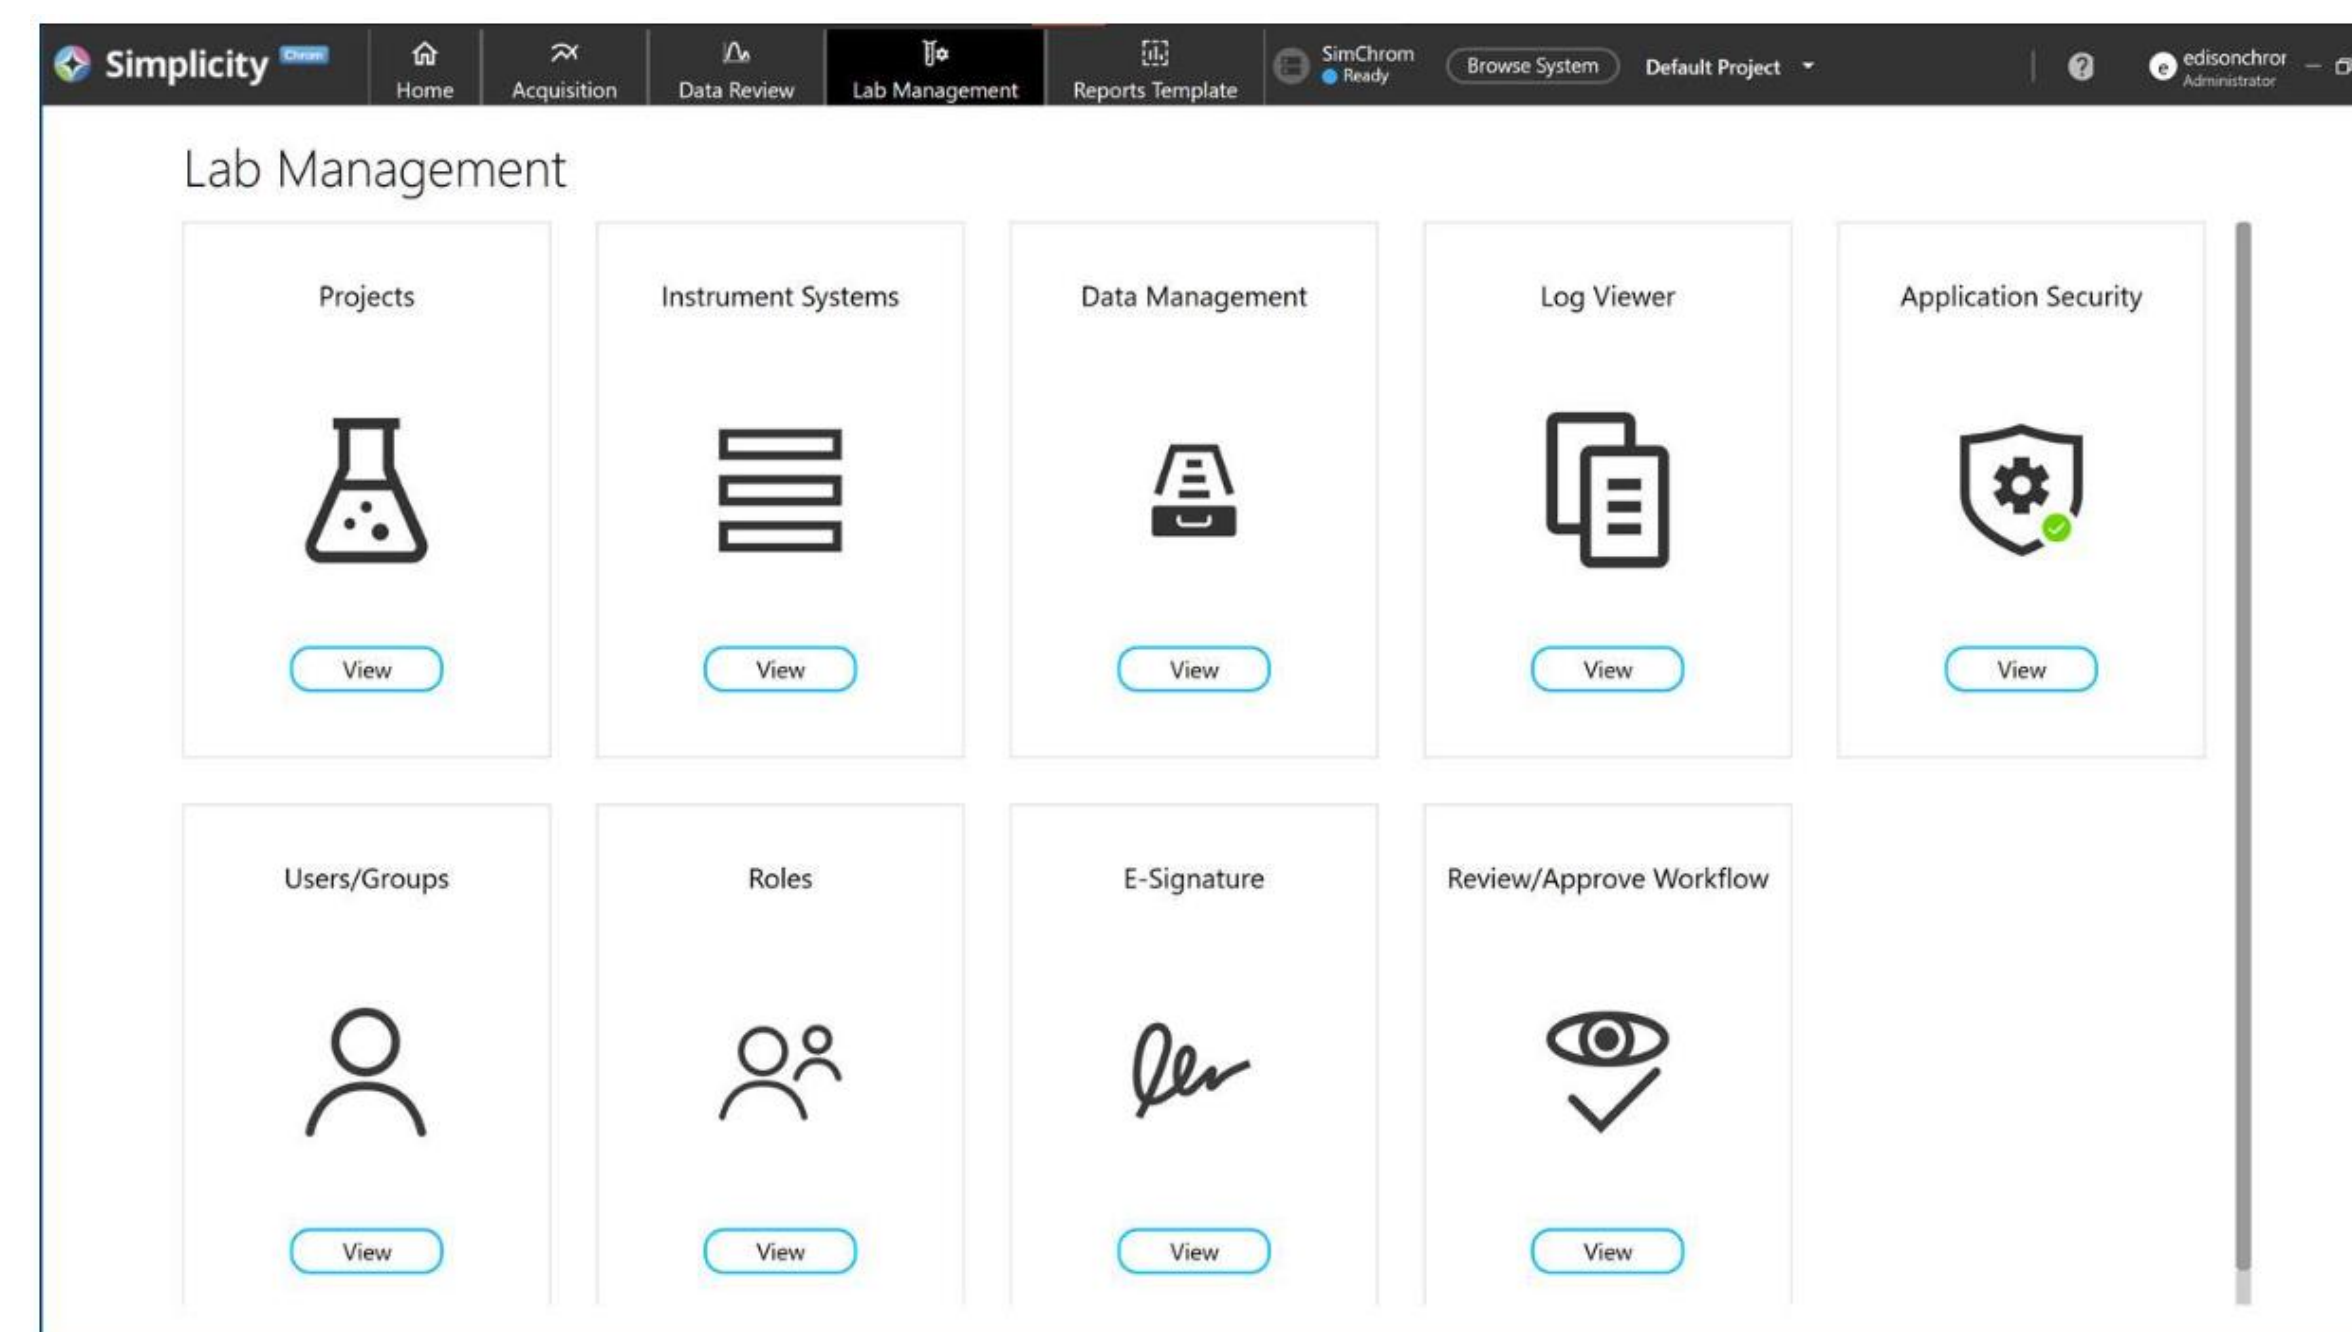

SIMPLE

Features of Simple:

- Intuitive interface
- Graphical design
- Easy to learn workflows
- Works across platforms
- Cloud based – data exchange, updates

Laboratory Transformation

SIMPLE

*Instrument and workflow
services solutions*

*Help laboratories
continuously improve
productivity, reduce
costs, and focus on core
scientific applications*

OneSource®

**Foundational
Technology
Suite**

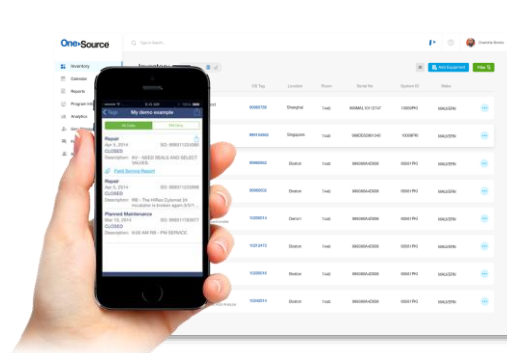

**Asset
Genius™**

RFID

Next Gen Portals

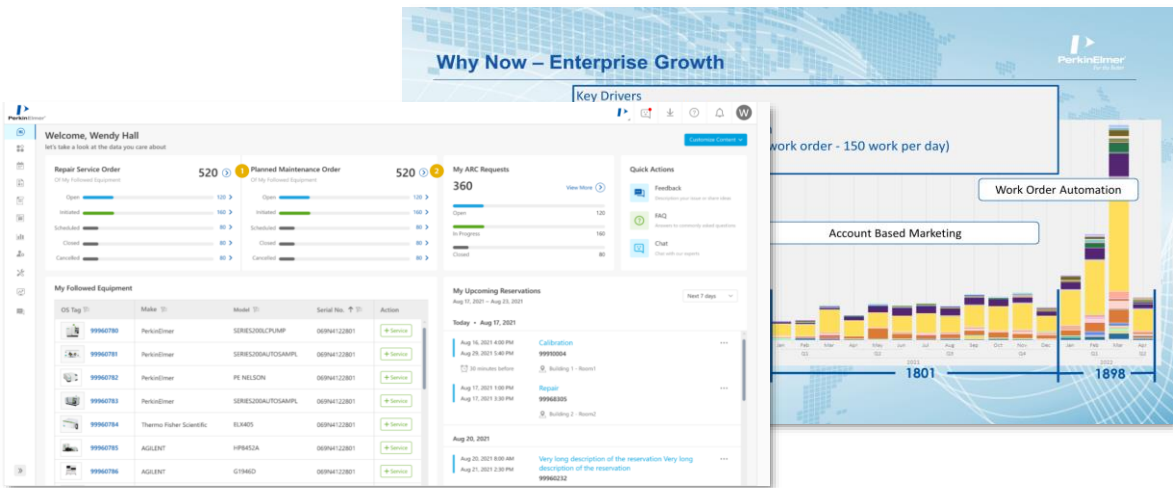

Dashboards

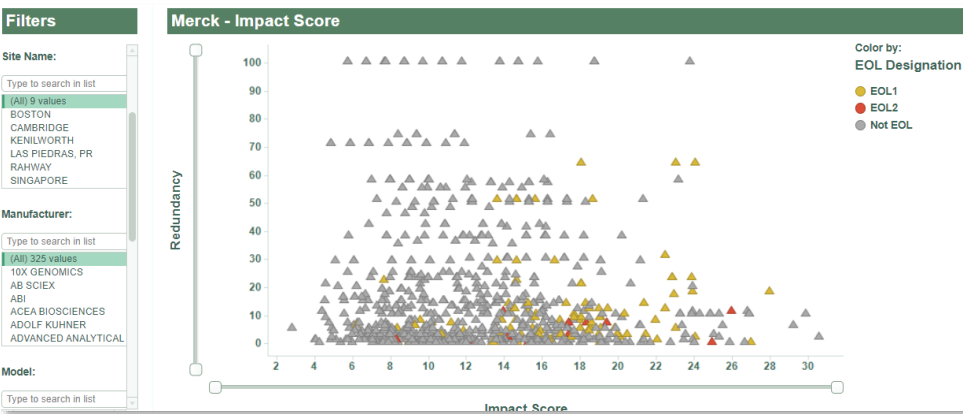

*Instrument and workflow
services solutions*

*Help laboratories
continuously improve
productivity, reduce
costs, and focus on core
scientific applications*

Field & Laboratory Services Portal

- ✓ Allows customers to monitor their **OneSource®** relationship
- ✓ Insights into **all assets** under OneSource®'s purview
- ✓ Ability to **call and track** maintenance orders
- ✓ **Cloud-based** platform

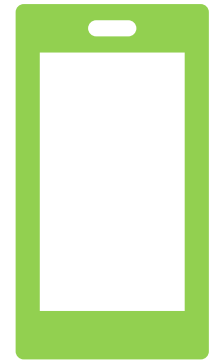

Value Delivery Dashboard

- ✓ **Identify assets** to retire / replace
- ✓ Find opportunities to improve **service delivery** or **reduce costs**
- ✓ Plan to incorporate productivity & **sustainability data**

Key Customers

Top 10 Pharma Companies

Laboratory Transformation

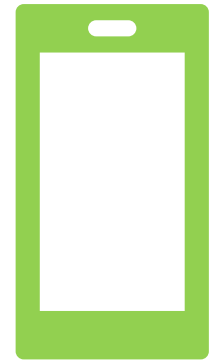

SMART

- ✓ Digitally connected technology
- ✓ Automated
- ✓ Machine learning
- ✓ Sensors, barcodes, monitoring, tracking
- ✓ Remote collaboration, data access, control

Laboratory Transformation

SMART

Features of Smart Instrumentation:

- Automated workflows
- Remote connectivity
- Flexible and Smart sampling capabilities
- Smart gas management
- Intuitive Design and Ease of Use

Features of Smart Consumables:

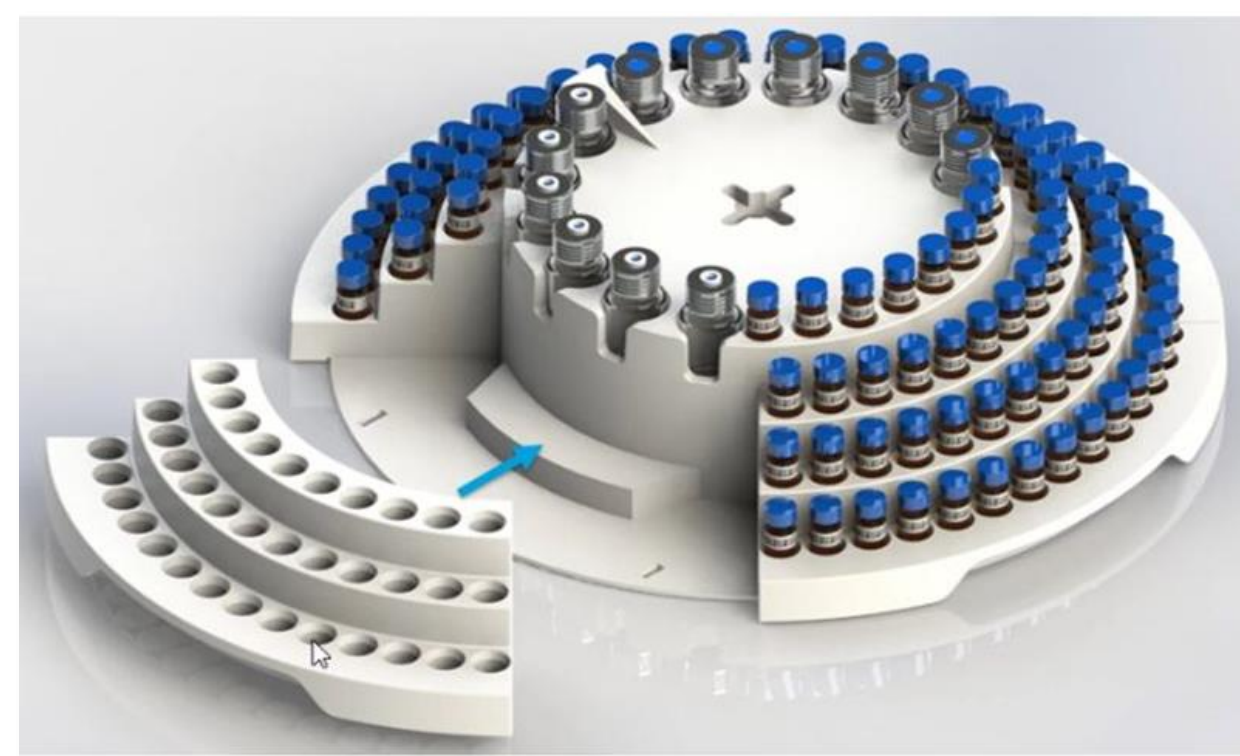

- Traceable
- Easy ordering, instruction links
- Optimize consumption, monitor lifetimes
- Automate inventory tracking
- Sample tracking

Not your average Autosampler

Modular Plug & Play automation devices

- High and low-capacity GC Autosampler trays
- Single & dual towers configurations
- Sharing Autosampler towers on multiple GCs

Laboratory Transformation

SUSTAINABLE

Sustainable by Design

Empowering Sustainability

Laboratory Transformation

Sustainable by Design

- Minimizing waste and environmental impact
- Reducing harmful solvent and gas requirements
- Increasing instrument and component lifespans
- Incorporating energy-saving features and recyclable materials

50% lower argon consumption

Laboratory Transformation

Empowering Sustainability

- **Battery Technologies** to support EV
- Reuse and recycling of **water**
- Maximizing **crop** yields
- Circular economy alternatives in **Plastics**
- Next-Gen **Materials**
- **Asset Utilization**

Laboratory Transformation

Empowering Sustainability

Orange County Water District

- Groundwater replenishment
- 20,000 samples each year
- Supply 2.5 million people with drinking water
- High throughput, reliable data generation are critical
- Low detection limit technology

NexION® 2000 ICP-MS

Soft Drink Manufacturer

- QA/QA testing
- Fast, robust method
- Utilization of non-hazardous reagents and standards – Green Chemistry
- Intuitive, full workflow solution designed to minimize user error and mitigate risk

Soft Drink Additives Analysis Workflow Solution

Asset Utilization : Innovating on Digitization & Sustainability

DIGITAL TRANSFORMATION – INTEGRATION OF AI & DATA ANALYTICS

KPIs, Financial Reporting,
Benchmarks

Provides
customers with
the ability to
monitor Assets,
Utilization and
Delivered Value

- ✓ Insights into **all assets** under OneSource's purview
- ✓ Ability to **call and track** maintenance orders
- ✓ **Cloud based** platform

- ✓ **Identify assets** that may need to be retired / replaced
- ✓ Find opportunities to improve **service delivery** or **reduce costs**
- ✓ Plan to incorporate productivity & **sustainability data**

SUSTAINABILITY

Allowing customers to **focus on the science** and **build a greener** laboratory services program

Customer Spotlight

In 2021, OneSource assisted in the decommissioning of ~1,300 assets

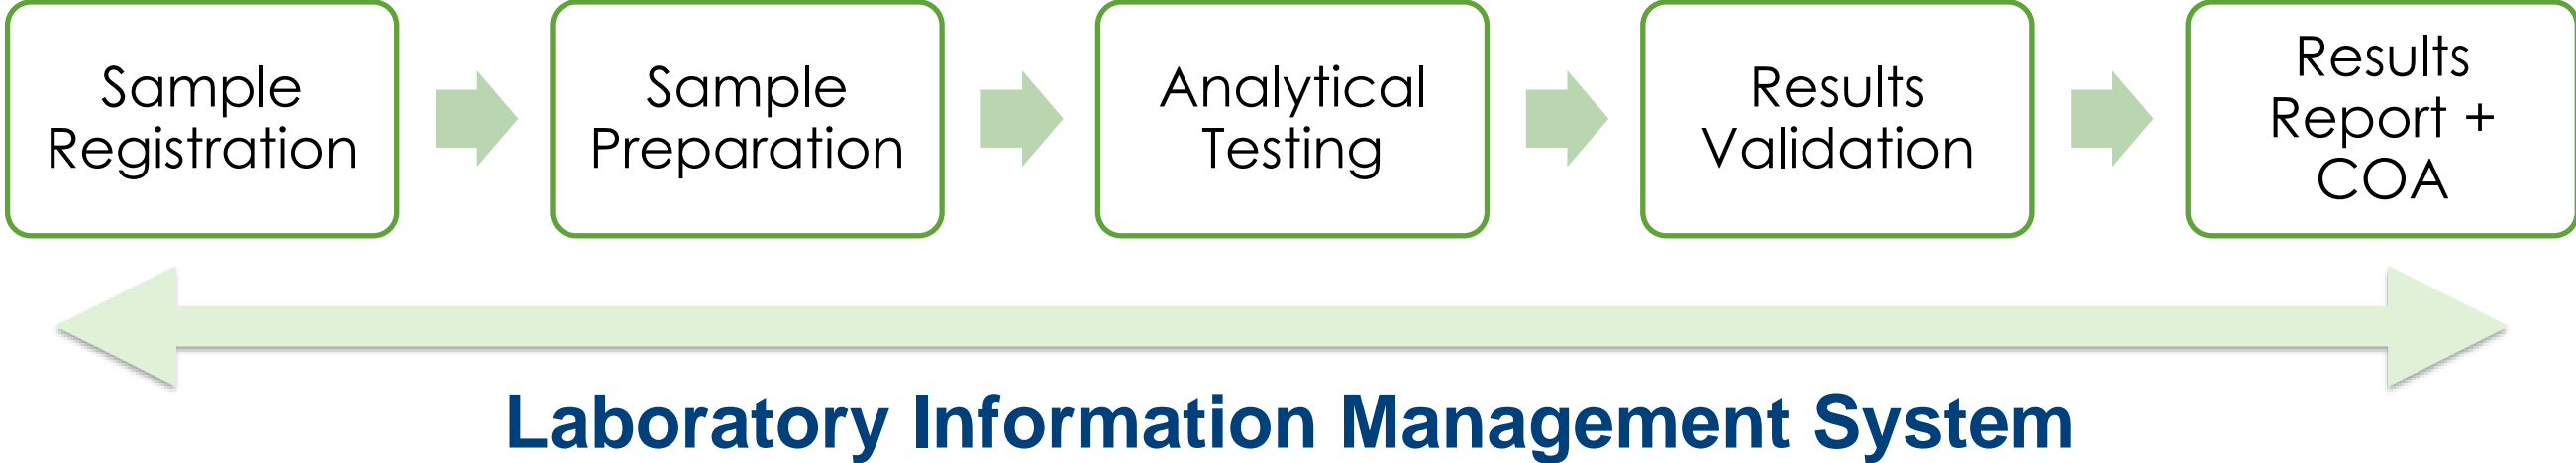

Annualized Utilities Savings

668k kWh

\$80K

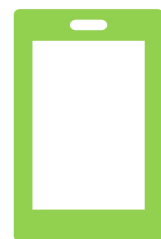

Lab of the Future benefits

Typical Environmental Testing Lab Workflow

SIMPLE

+

SMART

SUSTAINABLE

=

Increased Productivity

Improved Profitability

Advanced User Experience

Increased Flexibility

Higher Data Quality

Optimized Asset Utilization

A grayscale photograph of various laboratory glassware, including a round-bottom flask, two Erlenmeyer flasks, a graduated cylinder, a test tube, and a beaker, all containing liquid. The glassware is arranged in a row on a white surface against a blurred background.

How to Begin your Transformation

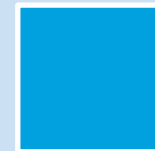

How to Begin Your Transformation to a Lab of the Future

Identify Operational Challenges to be Solved

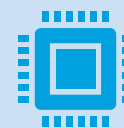

Create Business Case

Identify Key Stakeholders

Leadership Buy-In

Research and Select Solutions

How will Change be implemented

Roadmap to Becoming a Lab of the Future

Trial Projects

- Cost assessments
- Identify risks, barriers
- Demonstrate value, ROI

Incremental Implementation

- Establish Goals
- Gradually upgrade systems (instruments, IT need to be aligned)
- Minimize financial impacts, disruption
- Ensure adoption by lab personnel
- Establish metrics to monitor performance

Putting it Together - What will the Lab of the Future look like?

Putting it Together - What will the Lab of the Future look like?

Sustainable Methods

*Smart Carrier Gas management system
H2 as carrier – built in sensor for safety*

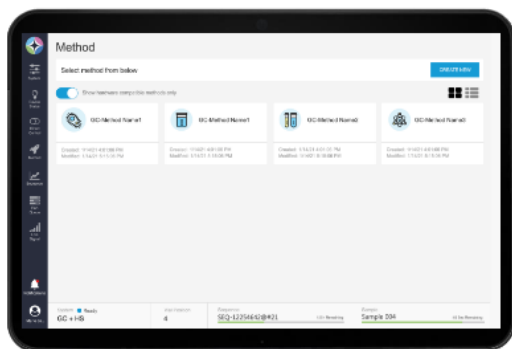

Integrated Laboratory Automation

*Plug and Play Automation
Automated Workflows*

Mobility / Remote Data Access, Interaction

*Simplicity Vision – status from any device
Integrated workflows into SimplicityChrom*

Graphical, easy to use Instrument Interfaces

*Detachable touchscreen
Customizable LEDs*

Smart Instruments

*SMARTsource Technology
Smart sampling capabilities*

GC 2400

Lab of the Future: Simple, Smart, Sustainable

Thank You!
