Solid Phase Extraction

- Used for large volume water samples
- Most challenging and time-consuming stage

Solid Phase Extraction

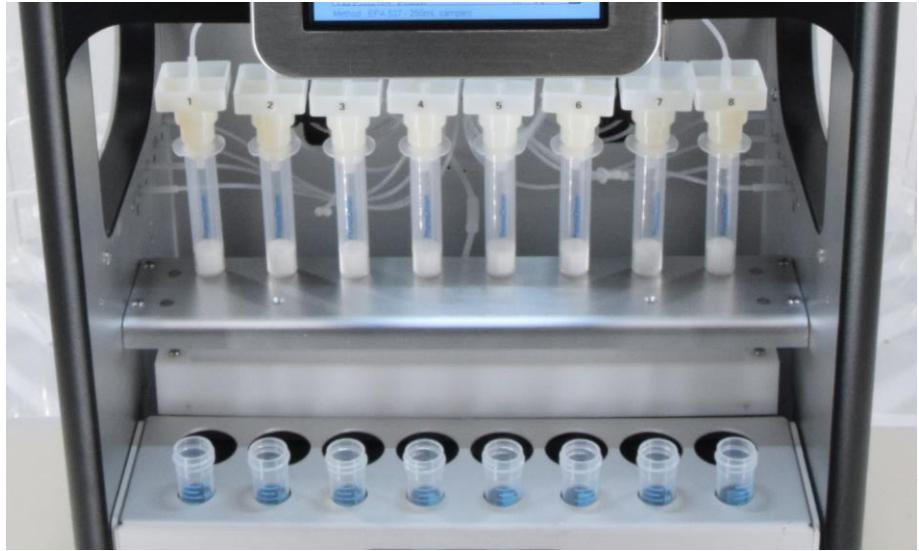

SPE-03 System

- Processes 8 samples in parallel
- Compatible with SPE cartridges and disks

Solid Phase Extraction

SPE Cartridges

Typically 1/3/6 mL
6mL is ~14mm

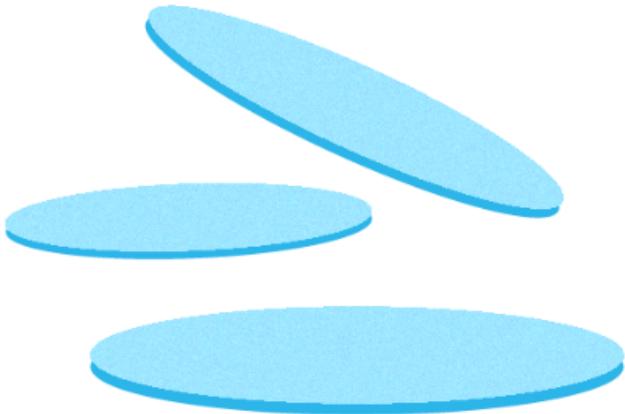

SPE Disks

Typically 47 mm

Cartridge vs Disk

DISKS

Pros:

- High flow
- Clog resistance

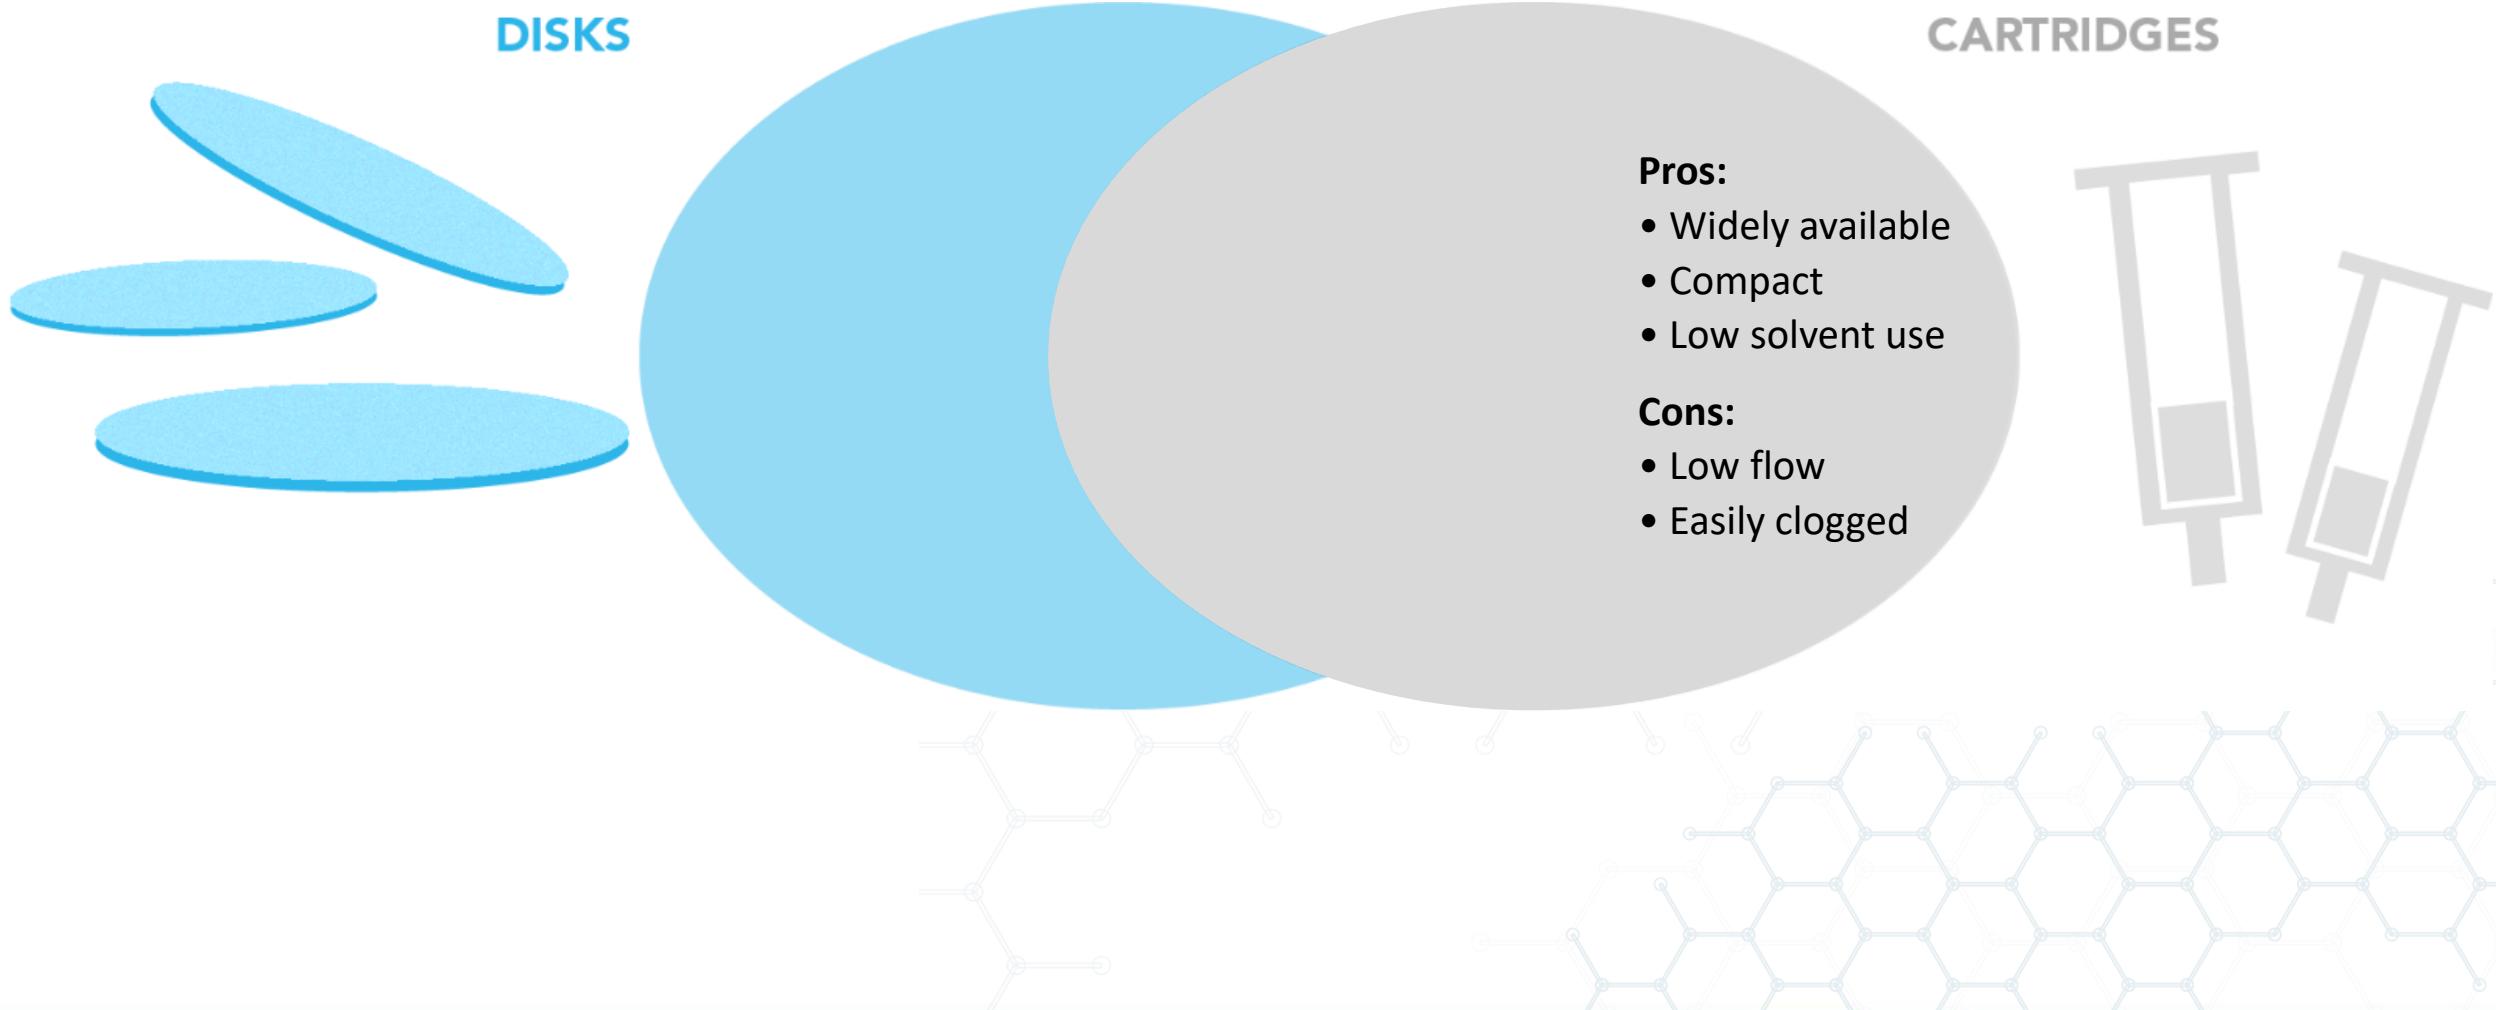

Cons:

- Limited options
- System compatibility
- High solvent use

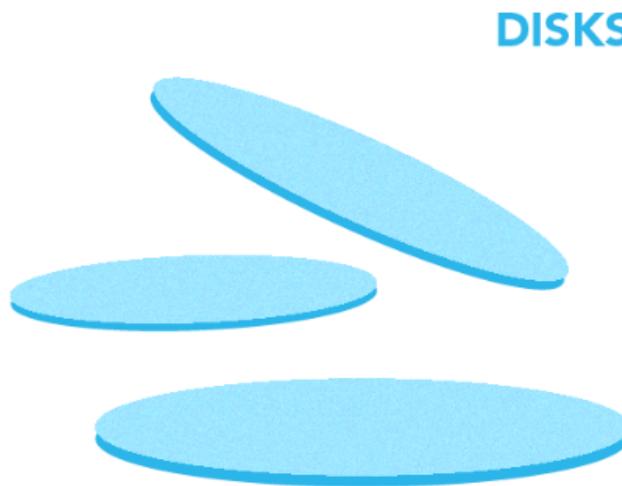

CARTRIDGES

Cartridge vs Disk
